## PROJECTS

- **Simple Voting System – Full Stack Web Application**  
As part of my self-learning, I developed a basic-level voting system web application using Spring Boot, JPA, MySQL, HTML, and CSS. The project helped me practice building RESTful APIs for simple user authentication, vote submission, and result viewing. I applied the MVC architecture to improve my understanding of full stack development and backend integration.
- **Smart Serve Cafeteria: Final Year Group Project**  
Developed a full-stack website Using HTML, CSS, JS, PHP and MySQL . Implemented features such as user authentication, product catalog, and order cart, online payment functionality
- **Software Station:**  
Empowering Access to Free Open-Source Software. A Central Hub for Users to Discover, Download. Focused on User-Friendly Web Development and Community Engagement
- **Portfolio Website:** [shivampisal.xyz](https://shivampisal.xyz)  
Developed a personal portfolio website using HTML, CSS, and JavaScript to showcase my skills and projects, featuring a responsive design and interactive elements.

## CERTIFICATIONS

- **Internet of Things (IoT) :** NPTEL, IIT Kharagpur, 2025  
Completed a government-certified course on IoT fundamentals, architecture, and applications.
- **ChatGPT + Bing (Copilot):** Prompt Engineering Masterclass  
Completed an online course focused on crafting effective prompts for AI tools like ChatGPT and Bing Copilot to enhance productivity and problem-solving.
